

# Richard Frazier

richard.frazier11@example.com | 710-258-4313 | Embedded Software Engineer (Mid-level)

## SUMMARY

Results-driven Embedded Software Engineer with 5 years of experience in firmware development and real-time systems. Proven track record in optimizing hardware-software integration for IoT devices and enhancing system performance through robust C/C++ programming.

## SKILLS

C/C++, RTOS (FreeRTOS, Zephyr), ARM Cortex-M Architecture, Embedded Linux, Device Drivers (I2C, SPI, UART), Git, JIRA, Oscilloscopes & Logic Analyzers

## EXPERIENCE

**Embedded Software Engineer** - NexusCore Systems (2021-03 - Present)

Lead the development of firmware for industrial IoT gateways, resulting in a 20% reduction in power consumption. Implemented multi-threaded drivers that improved data processing speed by 15% across several product lines.

**Junior Embedded Developer** - Veloce Robotics Lab (2019-06 - 2021-02)

Collaborated with hardware teams to bring up board support packages (BSP) for prototype robotics controllers. Automated testing procedures using Python scripts, reducing regression testing time by 30%.

## EDUCATION

B.Sc. in Embedded Systems Engineering - Summit Technical Institute (2019)
