SUMMARY

Results-oriented Cloud Engineer with 4 years of experience designing and managing scalable cloud infrastructure. Proven track record in optimizing CI/CD pipelines and reducing cloud operational costs through infrastructure-as-code automation.

SKILLS

AWS, Terraform, Kubernetes, Docker, Python, Jenkins, Prometheus, Linux Administration

EXPERIENCE

Cloud Engineer - NexusStream Solutions (2021-03 - Present)

Led the migration of legacy monolithic applications to a microservices architecture using EKS, resulting in a 30% improvement in deployment frequency. Automated infrastructure provisioning using Terraform, saving the team 15 hours of manual work per week.

Junior DevOps Engineer - Vertex Logic Systems (2019-06 - 2021-02)

Maintained CI/CD pipelines for 5+ core products and improved system monitoring coverage by 40% using Prometheus and Grafana. Assisted in streamlining the development workflow by implementing Dockerized local environments.

EDUCATION

B.Sc. in Computer Science - Summit Technical University (2019)
