

Daniel Moore

daniel.moore493@example.net | 001-706-430-0359 | Software Architect (Senior)

SUMMARY

Accomplished Software Architect with over 12 years of experience in designing scalable distributed systems and microservices architectures. Proven track record in leading cross-functional teams to deliver high-performance cloud-native solutions that improve system reliability by 40%. Expertise in driving technical strategy and mentoring engineering teams to adopt modern DevOps practices.

SKILLS

System Design & Distributed Systems, Microservices Architecture, AWS & Azure Cloud Infrastructure, Kubernetes & Docker, Go (Golang), Java/Spring Boot, Apache Kafka, PostgreSQL & Redis

EXPERIENCE

Software Architect - NexusFlow Systems (2019-03 - Present)

Led the migration of a legacy monolithic platform to a cloud-native microservices architecture, resulting in a 50% reduction in deployment latency and increased system uptime to 99.99%. Manage a team of 15 engineers while overseeing architectural standards for multiple product lines.

Senior Backend Engineer - Vertex Digital Solutions (2015-06 - 2019-02)

Architected a high-throughput event processing engine capable of handling 50k+ transactions per second. Mentored junior developers and introduced automated CI/CD pipelines that cut down regression testing time by 60%.

Software Engineer - PeakBridge Software (2012-05 - 2015-05)

Developed and maintained core backend APIs for an enterprise CRM tool. Collaborated with stakeholders to define technical requirements and optimized database queries that reduced response times by 35%.

EDUCATION

M.Sc. in Software Engineering - Evergreen Institute of Technology (2012)

B.Sc. in Computer Science - St. Meridian University (2010)
