

Travis Hayden

travis.hayden51@example.org | 624-996-9785x8623 | Cloud Engineer (Senior)

SUMMARY

Accomplished Cloud Engineer with over 8 years of experience in designing, deploying, and optimizing scalable cloud infrastructure. Proven track record of improving system reliability by 40% and reducing operational costs through advanced automation and Kubernetes orchestration.

SKILLS

AWS, Terraform, Kubernetes, Python, CI/CD Pipeline Design, Go, Prometheus & Grafana, Cloud Security

EXPERIENCE

Senior Cloud Engineer - NebulaStream Solutions (2020-03 - Present)

Architected multi-region AWS environments that supported 500k+ daily active users, resulting in a 99.99% uptime. Lead the migration of legacy monoliths to microservices, reducing deployment cycles from weeks to hours.

Cloud Engineer - Vertex Logic Systems (2016-06 - 2020-02)

Implemented Infrastructure as Code (IaC) using Terraform, streamlining environment provisioning and reducing manual overhead by 60%. Managed containerized deployments using EKS, optimizing resource utilization by 25%.

EDUCATION

B.Sc. in Cloud Computing and Systems Engineering - Summit Valley Institute of Technology (2016)
