

# Louis Rios

louis.rios220@example.net | (757)732-3482 | Embedded Software Engineer (Senior)

## SUMMARY

Results-oriented Embedded Software Engineer with over 8 years of experience in developing robust firmware and real-time systems. Proven track record in optimizing kernel performance and architecting scalable solutions for IoT and automotive hardware platforms.

## SKILLS

C/C++, RTOS (FreeRTOS, Zephyr), Embedded Linux, ARM Cortex-M Architecture, Device Drivers Development, I2C/SPI/UART/CAN Protocols, Python for Automation, Git & CI/CD Pipelines

## EXPERIENCE

**Senior Embedded Software Engineer** - NexusCore Systems (2019-06 - Present)

Leading the firmware development for industrial automation controllers, resulting in a 25% reduction in power consumption. Mentoring junior engineers and implementing automated hardware-in-the-loop (HIL) testing.

**Embedded Software Engineer** - VeloceTech Solutions (2015-08 - 2019-05)

Designed and maintained low-level device drivers for custom SoC hardware. Successfully reduced system boot time by 40% through kernel optimization for 3 major product releases.

## EDUCATION

B.Sc. in Electrical Engineering and Computer Science - Summit Valley Institute of Technology (2015)
