

Douglas Watkins

douglas.watkins760@example.com | 8715395840 | Software Architect (Mid-level)

SUMMARY

Results-oriented Software Architect with over 7 years of experience in designing scalable microservices and distributed systems. Expert in cloud-native architecture, system optimization, and leading cross-functional teams to deliver high-performance enterprise applications.

SKILLS

System Design & Architecture, Java (Spring Boot), Kubernetes, AWS (Lambda, RDS, EKS), PostgreSQL, Apache Kafka, Terraform, Microservices Pattern

EXPERIENCE

Software Architect - NexusFlow Systems (2021-03 - Present)

Lead the architectural design of a cloud-native billing platform, reducing system latency by 35% and supporting over 100k concurrent users.

Senior Software Engineer - Vertex Digital Solutions (2018-06 - 2021-02)

Spearheaded the migration of monolithic legacy modules into microservices, resulting in a 40% improvement in deployment frequency and system reliability.

Backend Developer - OmniCore Tech (2016-07 - 2018-05)

Developed and maintained RESTful APIs for fintech applications, ensuring 99.9% uptime and high data security standards.

EDUCATION

B.Sc. in Computer Science - Institute of Advanced Applied Technology (2016)
