

Jennifer Collins

jennifer.collins943@example.org | 001-941-381-9168x635 | Embedded Software Engineer (Junior)

SUMMARY

Motivated Embedded Software Engineer with a strong foundation in firmware development and microcontroller programming. Passionate about designing efficient, low-level solutions for real-time systems and eager to contribute to innovative hardware-software integration projects.

SKILLS

C/C++, RTOS (FreeRTOS), ARM Cortex-M, Embedded Linux, Git, UART/I2C/SPI, Python, Oscilloscope/Logic Analyzer

EXPERIENCE

Junior Embedded Software Engineer - Nexus Robotics Systems (2022-07 - Present)

Developed and optimized firmware for motor control modules, improving response latency by 15%. Collaborated with the hardware team to debug PCB prototypes using logic analyzers and oscilloscopes.

Embedded Software Intern - Vertex Electronics Lab (2022-01 - 2022-06)

Assisted in writing peripheral drivers for STM32 microcontrollers and automated unit testing scripts in Python, reducing testing time by 20%.

EDUCATION

B.Sc. in Electronics and Computer Engineering - Summit Technical University (2021)
