

Sherri Rodriguez

sherri.rodriguez703@example.org | 747-277-2227x94517 | Embedded Software Engineer (Senior)

SUMMARY

Highly skilled Embedded Software Engineer with over 8 years of experience in designing and implementing robust firmware for real-time systems. Proven track record in optimizing kernel-level code and developing hardware-software interfaces for complex IoT devices, with a strong focus on system performance and reliability.

SKILLS

C/C++, RTOS (FreeRTOS, Zephyr), ARM Cortex-M Architecture, Embedded Linux, Device Drivers Development, Git & CI/CD for Embedded, Communication Protocols (I2C, SPI, UART, CAN), Hardware Debugging (Oscilloscope, Logic Analyzer)

EXPERIENCE

Senior Embedded Software Engineer - NexusFlow Systems (2020-03 - Present)

Led the firmware development for a series of industrial gateways, reducing boot time by 40% and enhancing system stability through optimized multi-threading. Supervised a team of 3 developers and successfully deployed firmware updates to over 50,000 active devices worldwide.

Embedded Software Engineer - VeloceCore Technologies (2016-06 - 2020-02)

Developed and maintained kernel-level drivers for proprietary hardware components, resulting in a 25% improvement in data throughput. Collaborated closely with the hardware team to resolve critical timing issues and circuit-level defects during the prototyping phase.

EDUCATION

M.Sc. in Embedded Systems Engineering - Institute of Advanced Applied Technologies (2016)

B.Sc. in Electrical Engineering - Northridge Technical University (2014)
