

Kayla David

kayla.david229@example.org | 533-343-2481x164 | Embedded Software Engineer (Mid-level)

SUMMARY

Results-driven Embedded Software Engineer with 4 years of experience in developing firmware for real-time systems and IoT devices. Proficient in C/C++ development with a strong track record of optimizing system performance and reducing power consumption in resource-constrained environments.

SKILLS

C/C++, RTOS (FreeRTOS, Zephyr), ARM Cortex-M Architecture, Device Drivers (I2C, SPI, UART, CAN), Embedded Linux, Git, JIRA, Oscilloscopes and Logic Analyzers

EXPERIENCE

Embedded Software Engineer - NexGen Embedded Solutions (2021-03 - Present)

Lead the firmware development for a series of smart industrial sensors, resulting in a 20% improvement in processing speed and a 15% reduction in battery consumption. Collaborated with hardware teams to integrate communication protocols and debug complex peripheral issues.

Junior Embedded Engineer - Vertex Robotics Lab (2019-06 - 2021-02)

Developed and maintained device drivers for custom robotics hardware using C++, while assisting in the migration of legacy codebases to RTOS. Successfully optimized unit test coverage by 40%, enhancing overall software stability.

EDUCATION

B.Sc. in Electrical and Computer Engineering - Institute of Technology of Northern Valley (2019)
