

Jillian Miller

jillian.miller106@example.net | (541)783-8219 | DevOps Engineer (Senior)

SUMMARY

Senior DevOps Engineer with over 8 years of experience in designing scalable cloud infrastructure and optimizing CI/CD pipelines. Proven track record in reducing deployment time by 40% and enhancing system reliability through infrastructure-as-code and proactive monitoring.

SKILLS

AWS, Kubernetes, Terraform, Docker, Jenkins, Python, Prometheus, Grafana

EXPERIENCE

Senior DevOps Engineer - NebulaScale Solutions (2020-03 - Present)

Architected multi-region Kubernetes clusters on AWS, improving application availability to 99.99% and reducing cloud infrastructure costs by 25% through resource optimization.

DevOps Engineer - VertexStream Tech (2016-06 - 2020-02)

Led the migration of legacy monolithic applications to containerized microservices, decreasing deployment frequency from weekly to daily cycles using automated Jenkins pipelines.

EDUCATION

B.Sc. in Software Engineering - Summit Institute of Technology (2016)
